Description

ACES II SEATBACK IN FULL ALUMINIUM

This seatback is a very advanced piece to make, but we did it by making a BIG stamp mold, just to be sure we got all the details, curves, holes and different angles the right way.

When you get this piece in your hands, you know how much time and effort we put into this, just so you can get the right start on your seat.

This seatback is so advanced, and it will save you a lot of time in building it your self, and its so hard and strong and will be the backbone in your seat design.
